

Expert System

For Suggesting Pets

By: Sean Stemm, Robert Morace

Edited Last: ~11/16/2023

Summary:

- This Expert System will ask the users 8 questions and output potential pets that they may enjoy as a companion. If you have 'no preference' on the listed options, then you are prompted to type 'n'. The questions that we asked are:
 - What type of animal are you interested in?
 - What size animal are you interested in?
 - What is the minimum number of years you wish to spend with your future pet?
 - Do you want an indoor or outdoor pet?
 - What is your budget in dollars for the initial cost of a pet?
 - What is your preference for animal activity level?
 - What is your preference for noise?
 - What is your preference for the amount of maintenance and care required?
- After the system has either suggested a list of possible pets or told you that no matches were found it then prompts you with a continue or end option.
